

1. a) Determine the prime factorization of 36. Show your work.

$$\begin{array}{l} 1 \\ 6 \times 6 \\ 1 \times 1 \\ 2 \times 3 \times 2 \times 3 \end{array}$$

14

b) Is 36 a perfect square? Explain your thinking.

Yes, because an even number of each prime factor. $2-2^2$ $3-3^2$ 6×6

2.

Write the perfect square immediately before and after the whole number, and then estimate the square root of the whole number to one decimal place. Check your estimates with a calculator.

Perfect Square Before	Whole Number	Perfect Square After	Approximate Square Root
a) 25	27	36	5.2
b) 49	55	64	7.4
c) 100	105	121	10.2

19

3. Use the relationship to determine the length of C in each triangle, to the nearest whole number. Show your work.

$$\begin{aligned} 26^2 - 24^2 &= \sqrt{\frac{10}{100}} \\ 676 - 576 &= \sqrt{100} \end{aligned}$$

$$\begin{aligned} 39^2 - 15^2 &= \sqrt{\frac{36}{1296}} \\ 1521 - 225 &= \sqrt{1296} \end{aligned}$$

16

4. Determine the length of each hypotenuse. Show your work.

$$\begin{aligned} 40^2 + 9^2 &= \sqrt{\frac{41}{1681}} \\ 1600 + 81 &= \sqrt{1681} \end{aligned}$$

13

$$\begin{aligned} 12^2 + 35^2 &= \sqrt{\frac{37}{1369}} \\ 144 + 1225 &= \sqrt{1369} \end{aligned}$$

13

5. Use the Pythagorean relationship to find the unknown area of the square in the following diagram. Show your work.

11

6. The sides of a right triangle measure 15 cm, 20 cm, and 25 cm.

a) What is the area of each square? Show your work.

13

7. What is the area of the square on side t of each triangle? Show your work.

$$7^2 + 9^2 = t^2$$

$$49 + 81 = t^2$$

$$130 = t^2$$

$$t = \sqrt{130} \text{ cm}$$

8. a) Complete the table using information provided in the diagram below.

Area of Square	Side Length of Square
289 cm ²	17 cm
64 cm ²	8 cm
225 cm ²	15 cm

13

9. Aden decides to swim across a river that is 80 m wide. As he begins to swim the current carries him 60 m downstream. How far did he actually swim?

100m

$$80^2 + 60^2$$

100

$$6400 + 3600 = \sqrt{10000}$$

100

10. The foot of a ladder is 1 m from a wall. If the ladder is 6 m long, how far up the wall does the ladder reach? Give the answer to the nearest tenth of a metre. Show your work.

$$6^2 - 1^2 = h^2$$

$$36 - 1 = \sqrt{35}$$

5.9 m
